TELOS

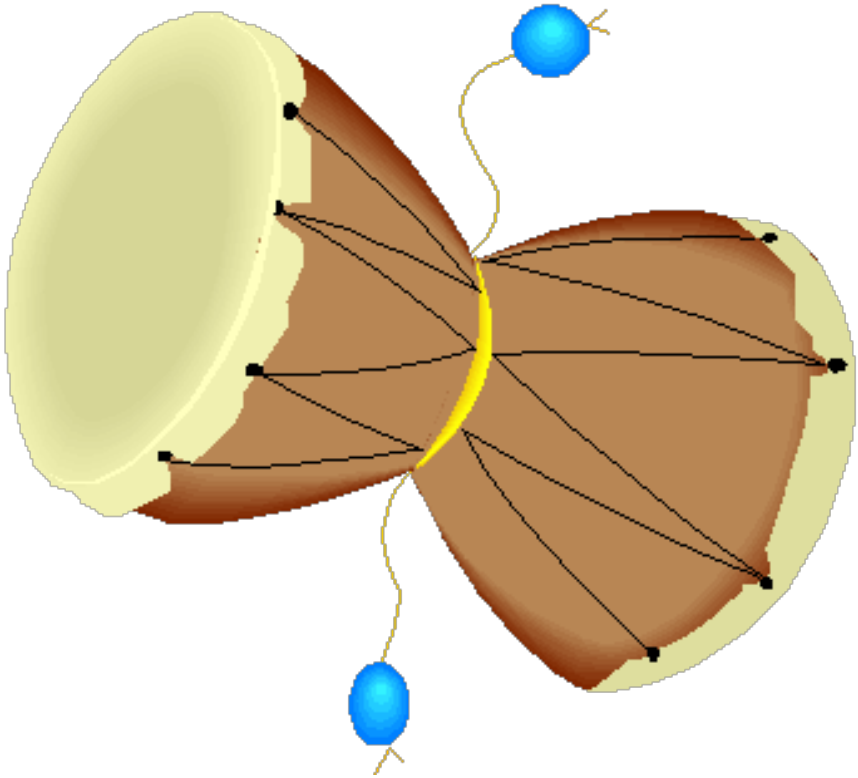
PART TWO
BY
MALIN TERKER

MALIN TEKER uses his gauntlet to open the bulkhead DOOR
MALIN TEKER You don't not have to use a plasma weapons i'd rather you left them in the closet provide
He walks them down the corridor into the right where there's a row of metal lockers .
MALIN TEKER You can keep all your personal items in these lockers they've each got a combination lock
ROBAR As long as I've got your complete cooperation
MALIN TEKER You can even retrieve them if you really want to we're not American, we're British .
JARRED Because the right bear arms does not extend to TELOS .
MALIN TEKER You lizards catch on quickly don't you .But you're in luck because the chef has prepared a lovely HADDOCK and chips .
INDIA MENZES DECK DE SILVA and HEATHER McKENNA is KITCHEN PORTER
MALIN TEKER May we take a walk back to the recreation center
The family sit themselves down in Chrome and wicker chairs next to a pool table .
MALIN TEKER TAM you gotta keep them occupied until we get a message from CANDEREL yeah
JAMES MENZIES But you did send the message didn't you.
MALIN TEKER Of course I did but we lost real time communications when ALPHA ONE used his plasma rifle on our dimension Gate .

JAMES MENZIES How are we going to keep them occupied
MALIN TEKER The best thing is to let them think they're running the place just for now until I get an answer .
ROBAR walks across the recreation kiosk .
ROBAR I want a full tour of their facilities after the meal .
MALIN TEKER I'll show you the mining area near the core of this planet .
SGT JARRED will stay with you so you don't deceive us .
INDIA MENZIES yeah ok we'll have Sergeant JARRED encase we say anything which might offend you
JAMES MENZIES or oh you're new friends there those Pepper pots over there with a squeaky voices .MALIN TEKER I'll take you down three levels to the Miners .
INDIA MENZIES Actually we all eat soya protein and reduce the main food elements to pills and tablets .
MALIN TEKER Which we haven't managed to do yet but that was actually one of our remits when we set up TELOS in the first place .
JAMES MENZIES CHIEF MOVER POUL and PRESIDENT VANESSA BELLAMY asked us to reduce the main food elements of pills and tablets with carbohydrates and vitamins but what we discovered was some subjects rejected vegetable protein .
MALIN TEKER which we can manufacture
INDIA MENZES That the vegetable protein is rejecting the egg substitute thanks to the **kumquats** .
MALIN TEKER We've managed to create this stuff it's called food substitute. It's not bad. We believe we can survive on it if we have to .
INDIA MENZES but we can't carry on producing it without supplies of syrups , cordials and juices from your GRATON CATALOG that we can eject into the vegetable protein .
MALIN TEKER There's no LIVE STOCK on TELOS you step outside that airlock you die instantly .

JAMES MENZIES Instant death if you step outside that airlock .
MALIN TEKER After this we'll go for a full tour of the facility three levels down and I do hope you're impressed .
JAMES MENZIES We've managed to find the source of PALLADIUM and VALLADIUM which are very precious metals .
ROBAR MAX VILMIO PALLADIUM is a Comedy Theatre in CENTRAL LONDON .
JARRED He's just recently come back from SOL 3 in the Western spiral arm of the Milky Way galaxy
ROBAR Some planet called DIRT or EARTH or some such foolishness .
MALIN TEKER and his family get up from the chrome and wicker chairs and walk past the pool table out the dining hall followed by ROBAR ,JARRED ALPHA 4 and MAX VILMIO then down a red and white corridor to a blue and pink lift descending three floors to TELOS technical zone .
They come out into a large cabin with resin plastic plinths gurneys and tables with V-O-C robots in various stages of assembly and walks through to five chrome and wicker office chairs to a glass desk where technician ROJ BLAKE sits doing some light assembly work .
TECHNICIAN ROJ BLAKE I have to inform you that we were sending regular suppliers of VALLIDIUM
and palladium through the dimension Gates back to KALDOR and GALDA PRIME where they''re used for assembly
MAX VILMIO I thought PALLADIUM was a comedy Theater in Central London .
JARRED You'll have to excuse MAX VILMIO, he'is just come back from the Western Spiral arm of the Milky Way galaxy, a planet called SOL 3 or DIRT or EARTH or some such foolishness .
TECHNICIAN ROJ BLAKE You haven't told them I'm here, have you .
JAMES MENZIES We lost real-time communication since you destroyed the dimension Gate .
MALIN TEKER I have spent a subspace message to CANDEREL
INDIA MENZIES That's a hub of the GALACTIC FEDERATION
MALIN TEKER And I will expect an answer in the near future does that answer your question ALPHA 5 So ROJ can you explain your latest research.

.JARRED This is Alpha 5 who's been running the science dome on Nimbus 3 with us as his ancillary staff
ROBAR And bodyguards .
MALIN TEKER W e combine robotics and bionics but we are running into some problems that we still eat normal food .
TECHNICIAN ROJ BLAKE So what I thought I'd do is I'll put a lever connected to a suction pump which will expel excess gasses after every meal .
INDIA MENZES. That was one of the first remits when we set up TELOS
TECHNICIAN ROJ BLAKE At waste height and when you press it a suction tube takes out excess gasses after every meal .
MAX VILMIO OUTSTANDING .



MALIN TEKER But the robotics is to help those who cannot move anymore we have not advanced to any further
JARRED I'd like to remind you that VILMIO has the latest from MILLIWAYS INCORPORATED on the Pharaoh Islands .
MALIN TEKER And how does this help us?
ROBAR My RUTONS can be made into any animal using Gene splicing .
JARRED And grow into a fully developed animal in laboratory conditions in birthing chambers.
JAMES MENZIES So if we use this research data for MILLIWAYS INCORPORATED we can get a more advanced bionic program , cloning tech, coupled with robotic inserts for work and survival in extreme environments .
ROBAR I would like to construct a new biomorphic transformation zone with bursting Chambers in technical zone number two to the left of your robotics Bay
JARRED And restart the the transformations of MILLIWAYS INCORPORATED from The Pharaoh Islands
INDIA MENZIES I'll take you down another three levels so

that we can go and see the mine
They walk down the red and white corridor to the blue and pink lift and go down towards the core of the planet with narrow metal gantries along an uneven Rock passagesShould I come out into a huge Cavern spanned by a metal bridge with a control room as its center.
TEKER This is SID MOTRUM, our mining controller .
MAX VILMIO Alright SID
SID MOTRUM It's here that we extract the VALIDIUM and PALLADIUM which is used on many of the components of the V-O-C robot back on KALDOR .
MAX VILMIO I'm sure the Palladium is a comedy Theater in Central London .
JAMES MENZIES in actual fact TELOS what set up long before the PHAROS PROBES and the V-O-C ROBOT was developed
INDIA MENZIES And we're very lucky in some ways that the V-O-C can travel on a PHAROS PROBE and find M Class planets and set up a dimension Gate ready for colonization
MALIN TEKER Are there would be no Galactic Empire
JAMES MENZIES Remember if you step outside that airlock all the Organic components will die .
ROBAR But what about uploading the human consciousness to a mainframe
a hard drive before death
MALIN TEKER That's theoretically possible but it's still in its early stages
INDIA MENZIES If you step outside that airlock all the Organic components of your Cyborg
MAX VILMIO the cyborg you intend to create using me as a template
JARRED All the Organic components of your cyborg will die
well I don't know yet will
ROBAR So how long is it going to take before the galactic Federation to get here
MALIN TEKER Excuse me
MALIN TEKER leaves the Cavern and uses his gauntlet to go through a bulkhead
MALIN TEKER monitor have you got that message from the galactic Federation yet
A synthesized ambidextrous voice MONITOR .

YES MALIN IT'S GOING TO TAKE 10 YEARS FOR A RESCUE MISSION IN BATTLESHIP GALILEO TO GET TO THIS SOLAR SYSTEM .
MALIN TEKER Until then we'll have to cooperate with ROBAR and his merry band of RUTON HYBRIDS. Thank you MONITOR continue monitoring and relaying messages to me .
TEKER goes back to CORE of TELOS .
MALIN TEKER I've just been informed by monitor that it would take 10 years for the galactic Federation to send one of their battle Cruise's
ROBAR So you can sit consider yourself a prisoner
MALIN TEKER Hang on a minute we've got over 150 workers here .
ROBAR And your relying on us just sustain them from Space Raiders
JARRED Our GRATON CATALOG so I can keep supplies up for the 150 men women and children on the base .
MAX VILMIO And as we have the resources and technology to advance your mission here on TELOS it makes sense for you to cooperate .
JAMES MENZIES So you make yourself a load more stable hybrids loyal to you using your mind brain interface .
ROBAR We'll need an army if we're going to put up any resistance to the galactic Federation .
MAX VILMIO well they always consider me as the average man you can take a sample from me
ALPHA FIVE take a sperm sample from MAX VILMIO and then synthesize his genetic codes and inject Into a natural ruton .
MAX VILMIO maybe INDIA MENZIES can take my sperm
INDIA MENZIES well I've had worse offers but that's not very romantic
ROBAR If INDIA menses here can take my sperm you can use my genetic material to make any of your new hybrids I will then use the robotics to enhance them
MALIN TEKER And bionics to reduce their food intake to pills and tablets as much as humanly possible
ALPHA ONE I might put them in a uniform with a place faceplate for no apparent reason
ROBAR I'll give them a faceplate for no apparent reason and I might even call them Cybermen
ALPHA ONE Yeah, let's do that .
